SOFTSHELL JACKET

HIGHLIGHT

The new Blackline Softshell Jacket is the perfect go-to when the temperature starts to drop and the days get shorter. Warming softshell fabric keeps you comfortably dry and stops you from cooling down too much. Flexibility and freedom of movement come as standard to keep you performing at your best – whatever the season. Stylish, reflective details offer added visibility. The new Blackline Softshell Jacket is the ideal choice when the weather turns bad.

SIZES

XS S M L XL XXL XXXL

FABRIC

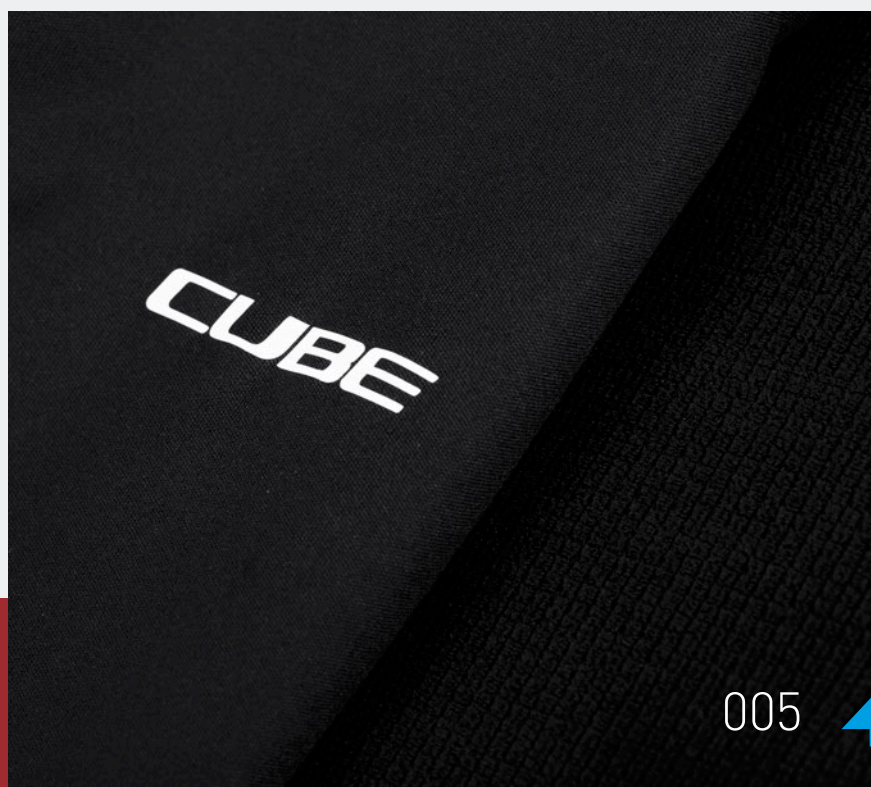

89% polyester / 5% elastane / 6% polyurethane

DESIGNED FOR

„Our new Blackline Softshell Jacket has you covered. Designed to meet the highest technical demands, it lets you focus on doing what you do best: cycling. Optimum temperature regulation comes courtesy of the high-quality technical fabrics. To cap off the feel-good factor, the jacket comes in a stylish, pared-down design with the perfect details just where you need them, like reflective inserts and a practical spray guard section at the rear. When the designers and technicians on our development team sat down to develop this product, their focus was on ensuring the perfect interplay of optics and function. We think they did a great job!“

TEAM CLOTHING

+ SLT AERO-SUIT

HIGHLIGHT

The SLT Aero-Suit makes it easy to perform at your best in competition. Its aero-optimised cut gives you the freedom and flexibility you need to go full gas on every leg of the race. Highly technical fabric wicks away moisture from the skin, keeping you pleasantly cool even when the effort gets you hot around the collar. It even dries quickly after the swim leg. The extra-light pad protects against chafing and ensures optimum performance. It's not too wide and not too narrow – so you'll hardly notice it when running. The three-part rear pocket has bags of room for race nutrition.

FIT

TIGHT REGULAR LOOSE

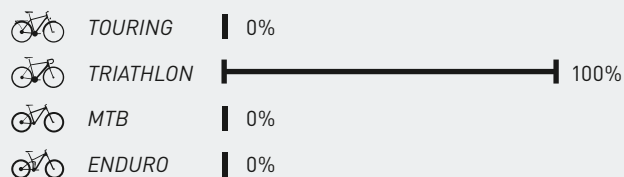

SIZES

XS S M L XL XXL XXXL

FABRIC

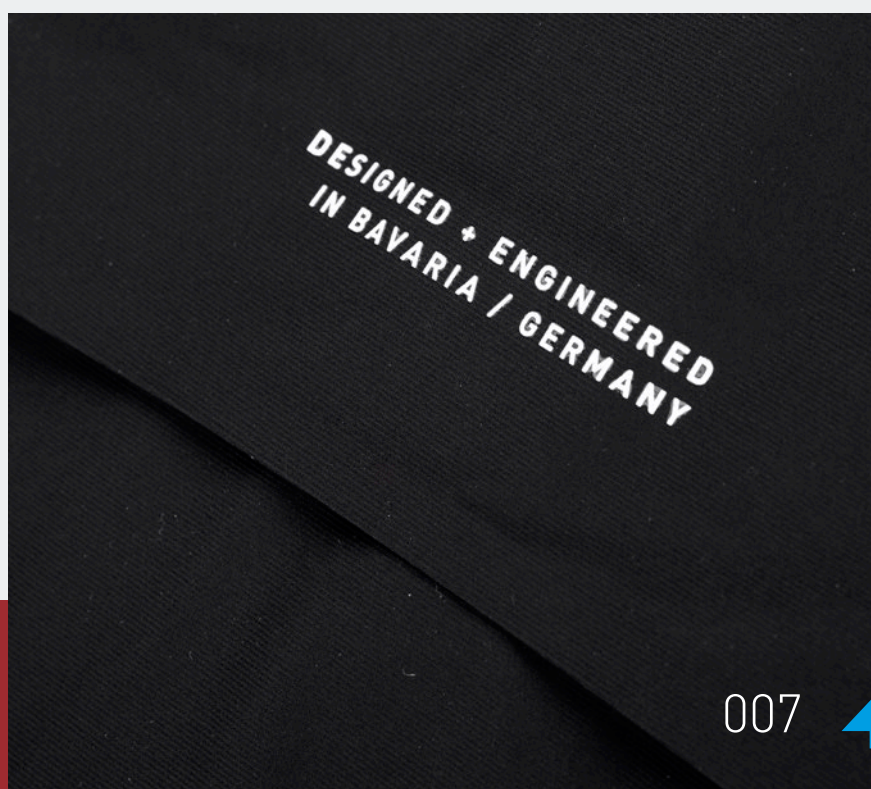

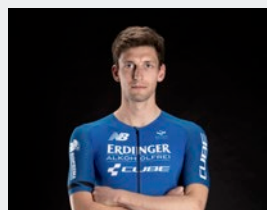

71% polyamide / 29% elastane

DESIGNED FOR

Triathletes are always looking for ways to eke out an extra few drops of performance. Skinsuit choice plays a huge role in this. Hydrophobic and flexible around the shoulders for swimming, it should fit like a glove for biking and running, yet be breathable and comfortable at the same time. It's the athlete's second skin, which makes finding the perfect balance between fit, aerodynamics and comfort the biggest challenge in my eyes. That was until I found the CUBE Aero-Suit – I trust it 100% in competition!

FLORIAN ANGERT
TRIATHLETE

+ **HERON**
HELMET

HIGHLIGHT

If you think aerodynamics come at the cost of an overheated head and painful neck – think again! After extensive wind tunnel testing, we came up with a design that directs cooling air over the entire head via deep ventilation channels yet doesn't look or feel too bulky in the process. It effortlessly comes in at below 250 g – super light for an aero helmet – meaning maximum comfort for an extra portion of speed even on long-distance rides.

FINISH

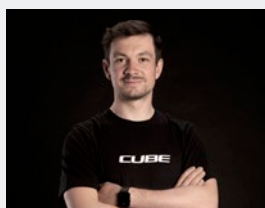

glossy brushed + matte

DESIGNED FOR

The HERON is the perfect all-round helmet, ideal for everyday use and with an aerodynamic design. It's great both outside and inside. Utilising the latest-generation of MIPS technology to absorb rotational forces in the event of an impact, the helmet offers added safety that goes above and beyond the legal minimum.

MARCUS SCHÖNEFELD
PRODUCT DESIGN

+ **DIRT 2.0**
HELMET

HIGHLIGHT

When things get sketchy, you'll be glad of the DIRT 2.0! The rugged ABS construction makes this lid perfect for everyday use on dirt lines and in the urban jungle. Fitting is a cinch courtesy of the SNAP 360 Fit System and ratchet closure. A helmet that's as versatile as your tricks.

GENDER **WOMEN** **MEN**

SIZES **S** (49-55) **M** (52-57) **L** (57-62)

MATERIAL **ABS/EPS**

FEATURES **SNAP 360 Fit System**
Flat dividers
Padded ratchet chin closure
Natural Fit concept

WEIGHT **370 g**

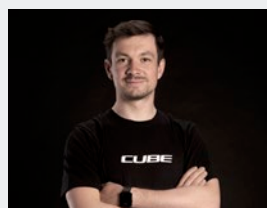

FINISH **matte**

DESIGNED FOR

Think dirt lids are all badly ventilated and uncool? Think again! Strategically positioned vents channel air directly through the super-deep interior channels for maximum air flow. Your head stays cool on even the most epic of summer pump track sessions. And if you're not in the mood for some crazy tricks, the DIRT 2.0 looks super cool in the city, too. Its modern lines and sturdy construction make this lid perfect for everyday use.

TEAMRIDER GLOBAL SQUAD

+ ATX OX SHOES

HIGHLIGHT

Looking for a shoe that stays stiff when pedalling for good power transfer yet is flexible enough to cope with short sections carrying the bike? Look no further – the ATX OX is a genuine multi-talent! Great traction even on rough terrain comes courtesy of the anti-slip sole that works both with and without cleats. The elegant design will appeal to riders of all ages.

+ RACE EVO COMPUTER

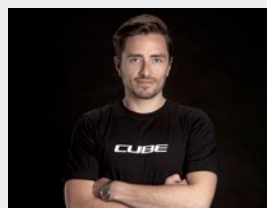

HIGHLIGHT

Everything at your fingertips. The RACE EVO Computer tracks and displays all the essential data so you can concentrate on taking your performance to the next level. With a barometric altimeter, heart rate and cadence functions, this little gadget is packed with big features. The RACE EVO also displays an elevation and heart rate profile during your ride. Store up to 8 tours and compare the results for ultra-professional performance analysis. You'll be smashing those PBs in next to no time!

TECHNOLOGY	wireless 2.4 GHz digitally coded
FUNCTIONS	50 incl. altimeter, heart rate (optional) and cadence (optional)
DISPLAY	3 fields with backlight
OPERATION	intuitive 4-button operation
MATERIAL	plastic
SIZE	57 x 41 x 15 mm (LxWxH)
WEIGHT	24 g

Our goal? To design a compact bike computer that packs a huge range of functions into an intuitive and practical head unit with an uncluttered display.

DANIEL ENGLBRECHT
PRODUCT DESIGN

+ **GRIP 0.5L**
BOTTLE

HIGHLIGHT

It's another one of those hot and dusty summer days made for lying in the hammock with a cold drink. My friends are sure to be at the local ice cream parlour. But I have other plans. Despite the sweltering heat, my mind is already on the next race – because I'm the proud owner of a tried-and-tested CUBE drinking bottle. I keep an eye on the level as always and know exactly how much I have left in the tank. Not a single drop of precious liquid goes to waste through the soft, ergonomic drinking cap, so there's even enough left for me to add on an extra loop at the end. I stay one sip ahead of the rest with the CUBE drinking bottles.

GENDER

WOMEN **MEN**

SIZES

0.5 l and 0.75 l

MATERIAL

PP/HET

FEATURES

large screw-top for optimum filling
two-part drinking cap
heart valve design
virtually odourless HET plastic

PADS

PADS OPTIMUM SUPPORT - OVER ANY DISTANCE.

TEAM PAD

This high-grade, elastic pad has been ergonomically optimised for medium to long distances (ideal for tours of 4 to 5 hours). The ergonomic, high-tech padding with smooth Skyving® surface and perforated dual-layer foam provides great comfort on long rides. A seamless construction and great breathability round out this highly wearable pad.

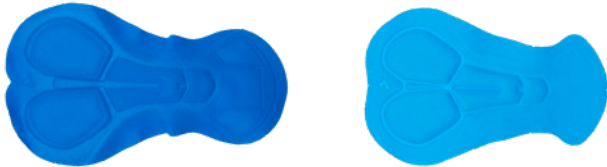

TEAM PAD MEN

TEAM PAD WS

TOUR LINER PAD

The ergonomic padding delivers optimum comfort in the saddle for leisure tours and short to mid-length distances (ideal for 2 to 3 hours). Maximum air circulation is guaranteed by the dual-layer foam construction and perforated surface. Quick-drying for great wearability from start to finish.

TOUR LINER PAD MEN

TOUR LINER PAD WS

ELITE PAD

With its pre-shaped anatomical curves, this high-end pad is designed to meet the most rigorous demands (up to 7 hours of riding). Made by Italian specialists, the pad uses a multiple-density foam construction that is particularly suited to road biking. The special anti-bacterial, moisture-wicking surface with carbon fibre effectively reduces skin chafing.

ELITE PAD MEN

ELITE PAD WS

MOUNTAIN PAD

This high-tech pad was specifically designed for liner shorts and is ideal for medium to long distances (4 to 5 hours). It is pleasantly thin and keeps its damping effect even on longer tours. The smooth Skyving® surface, double foam layer and ergonomic shape ensure optimum comfort in the saddle. The pad follows every movement thanks to seamless construction and high flexibility.

MOUNTAIN PAD MEN

MOUNTAIN PAD WS

TRIATHLON PAD

The triathlon pad is developed to meet the tough demands of riding super aero. Pressure distribution is second to none for unparalleled comfort, while efficient cooling comes courtesy of central ventilation channels and the functional X-Fifty weave.

TRIATHLON PAD

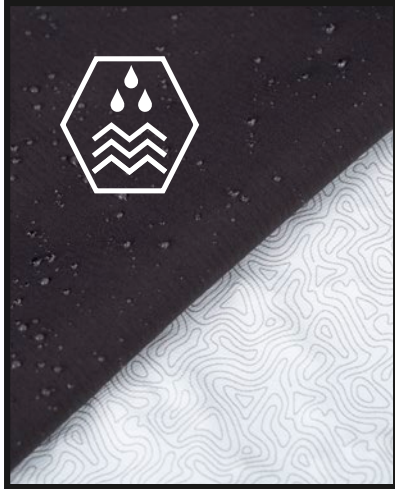

JUNIOR PAD

A special pad designed for junior cyclists. The extremely soft, thin, single-layer construction keeps the padding very flexible and breathable for optimum comfort on leisure tours and short to mid-length distances (ideal for up to 3 hours).

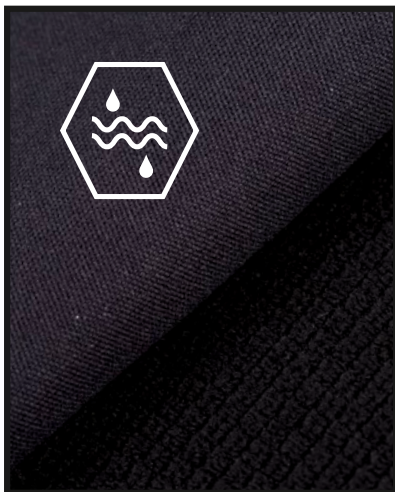

JUNIOR PAD

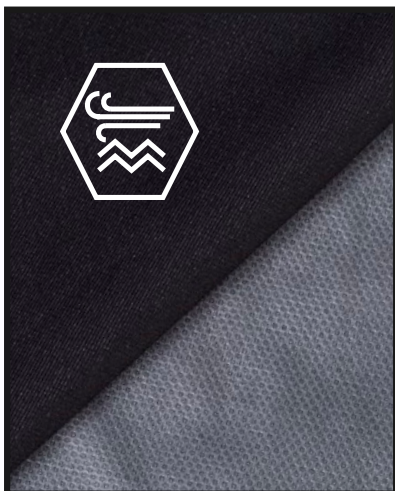

PRIMETRONIC

Primetronic material stands for protection from the elements, whether in an unexpected shower or a muddy ride. The special waterproof coating on this premium high-tech fabric keeps athletes dry and comfortable even in the most demanding conditions.

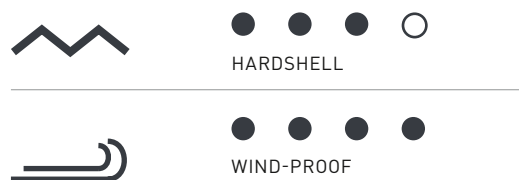

PRIMESHELL

Primeshell softshells guarantee the freedom of movement riders need to stay comfortable whilst exercising at high intensity in all weather conditions. The warming fabric comprises soft and insulating layers to protect the athlete from cooling down too rapidly or from overheating. Wind-proof and water-repellent yet highly breathable.

AEROPROOF

This technology combines a high degree of wind resistance with an extremely low weight and pack size. The water-repellent laminate and close weave protect athletes from cooling down and keep them dry during short showers.

MAXIMUM COMFORT AND WEARABILITY FOR SUPERIOR PERFORMANCE

Every product is subject to rigorous testing to ensure maximum comfort and wearability combined with great freedom of movement. Selected testers put the garments through their paces on the bike to test for fit and function. Their job is to check that the fabrics and features not only work well but offer comfort and freedom of movement. And because we want our clothing to make as many customers happy as possible, we design them to fit the current average body measurements.

TEAMLINE

FEEL THE RUSH.

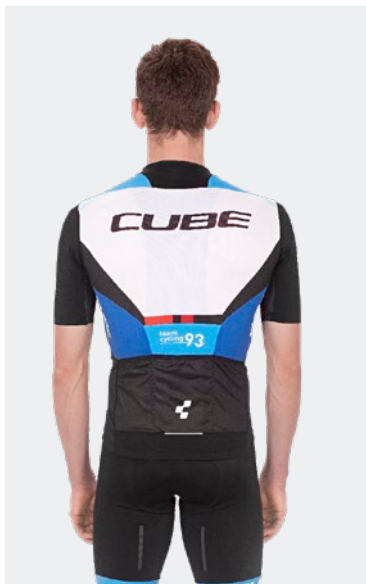

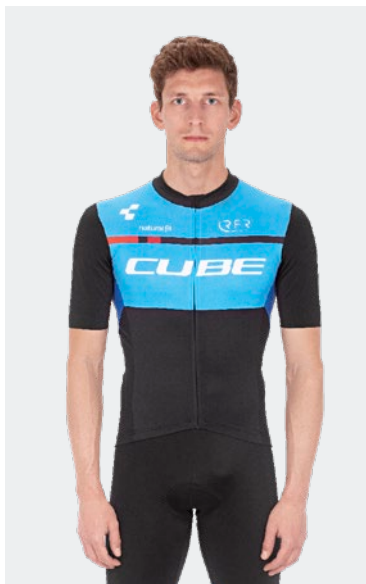

Our race isn't won or lost over the last few metres. We work together the whole day, keeping the peloton in check and reeling back in the breakaway. It's not only about looking like a team, but acting as one, too. Then it's my turn at the front – I battle against the wind, head down, hands in the drops, my gaze fixed on the stem and the team in my slipstream. 100 metres, 300 metres, and back out – we work in paceline formation. The Italian fabric and Skyving® pad offer more comfort in the saddle for longer, and more comfort equals more energy throughout the race. The sun beats down and I'm at my HRmax but my jersey and matching bib shorts stop me from overheating. The last lap now, the last corner, into the wind one last time. Everything runs like clockwork – with my team and my TEAMLINE.

BLACKLINE

DRESS UP, SHOW UP, **NEVER GIVE UP.**

Just ride! The weather isn't always ideal for a long sunny road bike outing, but I still want to feel the wind on my face and my heart pounding in my chest. The napped fabric of my Blackline Bib Tights stops me from shivering out on the windy open roads as I head towards my favourite climb. In fact, I work up a sweat as I fight to keep the pedals turning smoothly against the headwind. The technical fabric absorbs any moisture on my skin immediately and wicks it away to keep me comfortable and dry. Made it! At the foot of the climb I undo the zip on my matching Softshell Jacket and psych myself up for the hard effort to come.

SLT

FUNDAMENTALLY **FAST.**

The day is finally here. I've been working hard towards this race for weeks. I stuck to my nutrition plan (with immense effort!), ticked off my training sessions one by one, and got my bike ready with meticulous attention to detail. The last piece in the puzzle is my SLT kit. It saves valuable seconds and gives me the edge over my rivals. With its perfect fit and highly technical fabrics, the jersey stays super comfortable whilst giving me full freedom of movement so I'm not even worried about tackling the unusually long race.

11295 black'n'blue

AM SERIES

RUN-OF-THE-TRAIL.

It's 5.30 am on a Wednesday morning and just starting to get light outside. I jump on the bike and head around the corner to meet the guys. Together, we traverse mist-covered fields and forest. I'm glad to be wearing my storm jacket – it keeps me comfortably cosy and dry in the cold morning drizzle. Eventually we emerge from the forest and reach the look-out point. We take in the sunrise and tuck in to our packed breakfast. The first rays of sun push through the clouds and the day begins to warm up. Time to go, the office is waiting! I quickly shake dry my backpack and stow it away in my jersey pocket with ease thanks to the mini pack size. The summer working day can begin.

EDGE

LIVING ON THE EDGE.

Last night you threw your kit in the camper and headed off to the bike park with your crew. Now it's time for an al fresco breakfast. You're still early enough to catch the first chair of the day. But for the moment you enjoy feeling the morning sun on your skin and the smell of freshly brewed coffee. You grab your lift pass, car key and a muesli bar and pack them in your shorts pockets together with your phone – just in case. The lift is enveloped in the morning mist but as you reach the top the sun is rising over the mountain. Your motivation is sky high! The group shreds the first trail of the day and your whoops of joy can be heard far and wide. Your bike isn't the only thing that has to cope with the rigours of the ride. Your kit needs to give 100% performance through into late evening. It's been a great day and you sink into bed tired but grinning – because you know you can do it all again tomorrow ...

TOUR

FOR EVERY **EVENTUALITY.**

Another day of perfect weather awaits. Perfect for spending long days outside in the fresh air – for me, that means riding my bike. My Nuroad and I can hardly wait for the new season to begin. I jump in the saddle, head first to the burger joint and then to the outdoor swimming pool. What does the evening have in store? Let's wait and see! All I know is that it's likely to be a late one. With my Tour shorts and matching jersey I look cool both on and off the bike. No need to bring a change of clothes along – all I need are my trunks and a towel. Let's go!

JUNIOR

HIGH FLYERS.

Seeing the CUBE Actionteam shred the trails live and meeting the riders to say "Hi" has been a long-standing dream of mine. We're going to Italy tomorrow and dad has promised me that my dream will finally come true. I must remember to pack my jersey that mum has washed especially. The CUBE Actionteam riders will love it when I turn up in the same kit as them. I might not be a pro yet, but I'm almost as fast!

BASELAYER

CYCLING **BASICS**

Today is the day we head off on our four-day cycle tour! The weather is perfect and I'm wearing the Baselayer Mesh Shirt between my skin and jersey. It quickly transports moisture away from my body to keep me feeling pleasantly dry even when the mercury starts to rise. The form-fitting design means it stays firmly in place and feels barely there, like a second skin. My Mesh Shirt Baselayer gives me the edge over the rest of the group, who complain about their jerseys feeling sticky on their skin. I love having the perfect Baselayer for optimum temperature regulation in all weathers.

AFTER RACE

RELAX IN STYLE.

+ The finish line is here: the last metre conquered. I stop, get off the bike and lean it against the crash barriers before dropping exhaustedly onto the grass. The blood still rushes in my ears, my heart races. The final sprint was tough but my training paid off. It couldn't have gone better. After loads of jostling for position, I jumped on exactly the right wheel and dug deep for the last few metres. Good legs, good team, good day. I reach for my t-shirt and hoodie: I don't want to cool down too much and miss next week due to a cold. The atmosphere is euphoric: What a great end to the weekend! Time to put my legs up and enjoy a relaxing evening.

WORK SERIES

WORK IN STYLE.

Don't you just hate it when you're tinkering with the bike and feel like you need an extra pair of hands to hold stuff? As I grab a hex key with my right hand and the left holds everything in position, this is definitely not the time to drop that essential bolt! But now it's no problem. The spacious pockets of my Work Vest are full of screws and other little parts. I'm bound to find another bolt in the right size. And the comfy Work Pants are perfect when I get round to looking for the bolt I dropped. They offer plenty of freedom of movement, are easy to clean and look great paired with the Work Vest.

+ „WHEN IT COMES TO HELMETS, WE SEE NATURAL FIT AS
THE PERFECT SYNTHESIS OF COMFORT AND PROTECTION“

The Natural Fit brand's know-how in the field of ergonomics and the human anatomy plays a key role in our helmet design process. Not only do we consider the general fit of the shell, we also look to incorporate additional adjustment options to ensure the best possible fit on all heads. The general fit is developed on the basis of global anatomical studies concentrating not only on the shape of the head, i.e. the relationship between head width and length, but also the structure of the skull. In particular we look at the bone sutures. The large number of free nerve endings make these areas especially tender and much more sensitive to pressure. As a result, we

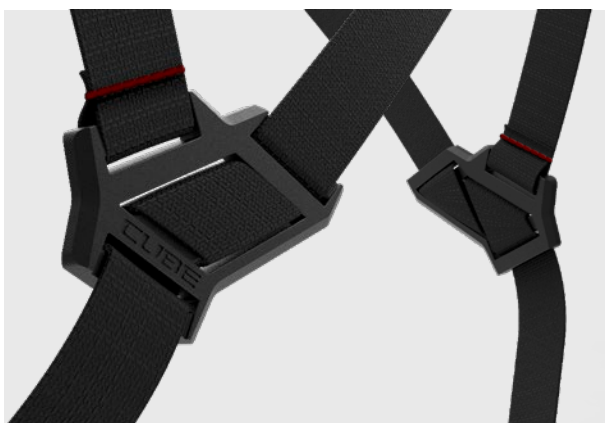

incorporate internal pressure-relieving channels in our CUBE helmets for a huge improvement in comfort and wearability. Additionally, we pay special attention to the micro adjustment options using our fit system which is also designed to avoid pressure points. We have made huge leaps forward in the area of ergonomic design by researching the paths of larger blood vessels under the surface of the skin. Our fit systems take the pressure off and won't give you a headache – even after hours in the saddle.

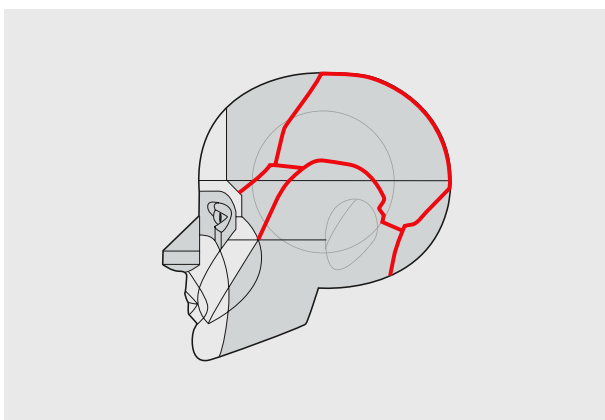

CUBE SILC 180+

Optimum pressure distribution thanks to the high degree of flexibility and wide range of adjustment options of CUBE's own fit system.

CUBE FLAT DIVIDER

The new style of divider guarantees twist-free routing of helmet webbing to make chafing a thing of the past.

ANATOMICALLY CORRECT

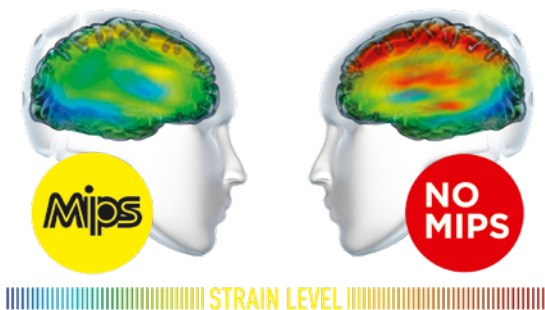

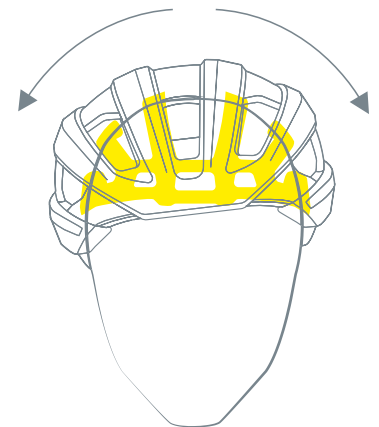

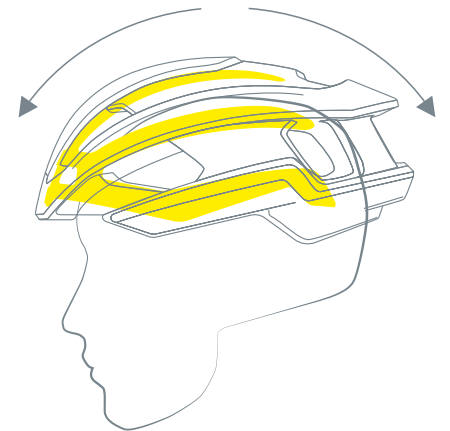

Ventilation channels and contact points have been optimised for pressure-sensitive areas – because a good fit equals comfort.

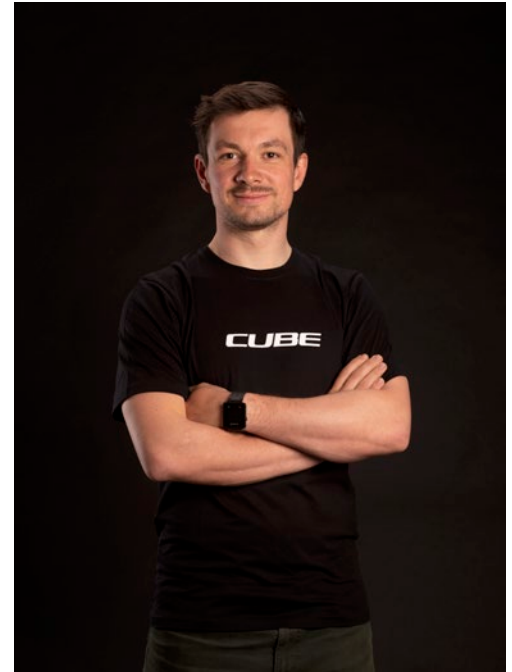

WHAT IS MIPS?
AND HOW DOES IT WORK?

In a helmet with MIPS Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

HOW MUCH DOES THE MIPS LOW FRICTION LAYER MOVE RELATIVE TO THE HELMET?

In a helmet with MIPS Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

MARCUS SCHÖNEFELD

PRODUCT DESIGN

Our biggest priority when designing our helmets? Safety! That's why we took it one step further and incorporated MIPS technology. No other system so reliably absorbs rotational forces to offer effective protection to the brain in the event of an impact. When it comes to safety, CUBE helmets stand head and shoulders above the legal requirements.

ROAD

IT'S ALL IN THE HEAD.

+

The win will be mine! I know exactly which line to take this time through the last corner to carry maximum momentum onto the finishing straight and get into the best position for the sprint. Past the pothole that destroyed my tyre last time and cost me the win. One last gear change – hopefully it's the right one. I push down on the pedals and demand everything of my chain and my thigh muscles. My bike and I are both at the limit. One last glance at the exit of the corner and the contorted faces of my rivals. I keep a cool head in every challenge – thanks to CUBE's road helmets.

OBSTACLES IN YOUR PATH **MAKE YOU BETTER.**

+

It was love at first sight when I discovered this trail years ago. It's pure flow with loads of jumps – a paradise for me and my bike. Countless lines keep boredom at bay and put all my skills to the test. If only I could make it through the gnarly rock garden I've never managed without crashing. But I never stop trying, because my CUBE mountain bike helmet has my back. It keeps the chances of injury down to a minimum so I can focus on the challenge and hone my skills!

ALL TERRAIN

CITY. COUNTRY. **HELMET.**

+

It's another rainy Monday morning. Another annoying search for my car key. That's when I decide: Things will be different today! I grab my bike, helmet and rain jacket and head out into the wet. I begin my day motivated and on a high, knowing that my colleagues were stuck in traffic – again. The fresh air and exercise help my day to fly by and just as I finish work the skies brighten up. I cycle to the nearby lake and enjoy a hard-earned refreshing drink in the evening sunshine. Our all-terrain helmets are as varied as the weather and reliable whatever the situation.

KIDS

HELMET ON - THE ADVENTURE CAN BEGIN.

+

Today's the day I am finally allowed to ride to school unsupervised. Dad and I have ridden the route and gone over every dangerous bit a hundred times. Mum has packed my lunch and explained the way over and over – they both think I'll stick to it. On the way there, I carefully keep to the agreed route but on the way home, I'm hungry for adventure. I've heard from some of the older boys about an awesome jump on the building site, and it only involves a short detour. Time will tell if I can nail the jump, but I know I'll be well protected trying. CUBE's junior bike helmets not only put my parent's minds at ease, they also protect the heads of young adventurers.

DUAL-DENSITY INSOLE – DAMPING + COMFORT

+ CUBE X NATURAL FIT INSOLES

Unlike other brands, CUBE insoles are deliberately designed without arch support. Pressuresensitive film tests have shown that even riders with the most varied of foot postures benefit from our neutral ergonomic soles. The lasts and soles were designed to work as one based on foot rollover characteristics during walking. Together, the last and insole support the natural movement

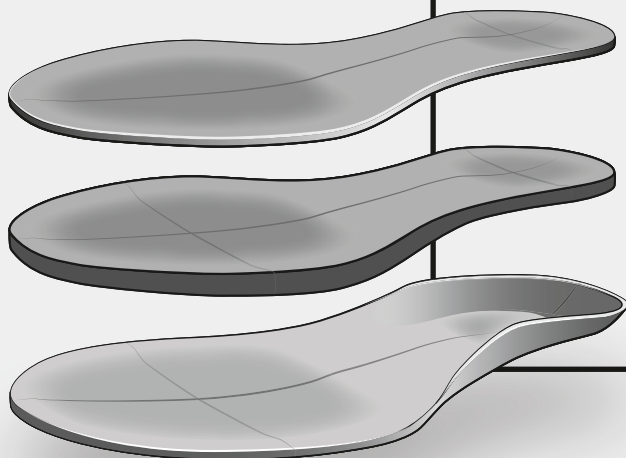

of the foot inside the shoe. Making even the trickiest trail a walk in the park.

GRIPPY IN EVERY SITUATION

SUPtraction is a Swiss-based company that designs high-performance soles with special rubber blends. From concept to final product, we oversee every step of the process to ensure we only deliver the best. Customers can take advantage of our custom solution service. We intelligently design the sole profile using a selection of zones and thicknesses to create the best possible result for specific activities.

SUPtraction F Blend

Our F blend is designed specifically for use with flat pedals. The soft, sticky compound delivers maximum traction on all flat pedals. Not only that, but it's also extremely durable and hard-wearing.

HEEL DAMPING

Outstanding damping meets low overall weight thanks to the phylon midsole.

RUBBER TOE UND HEEL PROTECTION

High-profile heel and toe bumpers offer added protection for your feet and shoes.

MTB

YOUR RIDE, OUR MISSION.

+ One last deep breath before the starting gun goes off. The tracks quickly begin to narrow. I fly through the trees, following the tyre tracks left in the damp earth. A steep incline appears ahead; I get off and shoulder the bike. The grippy profile on my shoes grab at the changing ground below me as I climb and I remount before the others. I reach down and find the fastener immediately. I quickly adjust it so that the outer sits even more snugly against my foot. Optimum fit and easy to use – the magic words that promise maximum comfort and stop my ride from being pure torture.

YOUR EXPERIENCE, OUR VERSATILITY.

+

I often set off with my friends with no idea of what to expect. We head out of the city and upriver to the nearby mountains. My all terrain shoes are great for coping with all eventualities. They're the perfect combination of sporty functionality with contemporary design yet are ideal for everyday use. So you can concentrate on tours of any length and take in any type of terrain.

ROAD

YOUR TOUR, OUR DEDICATION.

+

Just five kilometres to go. I dig deep, my legs are screaming, it's lactic acid overload but I've still got something in the tank. My legs pound their rhythm mercilessly and I level my gaze at the horizon. I pedal like crazy, sense the bike soaking up the power being pushed through the rigid carbon soles and hear it crying for more. Just 50 metres to go, then finally it's down the winding road – and done! I say another silent thank you to my equipment, designed with minimum weight in mind. The road shoes are not just comfortable and modern, they also get me to my destination faster.

SHOES

GRAVITY

YOUR TRIP, OUR ASPIRATION.

+

I check the strap on my shoe one last time, clip in and go. The STRIX feels most at home in challenging stony and rooty conditions with plenty of drop offs and new trails to discover. I can sense how the clip mechanism allows the shoe to become one with the pedal. The stiffened design with a damping midsole absorbs even bigger impacts perfectly. But on the off-chance I hit a stone despite the perfect line choice, the reinforced toe box and heel cap will protect my feet against the worst. It's the perfect companion on anything from bike park trails to a chilled evening loop. What are you waiting for? The trail is calling!

SHOE COVERS

WE HAVE THE SOLUTIONS TO **EVERY SEASON'S CHALLENGES.**

+ It's cold and rainy outside. Autumn has definitely arrived in the Fichtel Mountains. The warm training days have come to an end. But that's no excuse: My endurance shouldn't suffer just because the weather is bad. I jump on the bike and do my best not to freeze. I pull on a base layer, second layer and outer layer to protect my upper body, while the Primeshell bib tights keep my legs well covered. Now I just have to find the right overshoes from the three pairs in my collection. With various options to choose from, my feet stay dry and – most importantly – reliably warm, even in rainy, muddy, icy or bitterly cold conditions.

GLOVES

NATURAL FIT GLOVES

CONTROL THE STREETS.

+ New city, new cobblestones. But there seems to be rather a lot of them in my adopted home. My commute takes me through parts of the city's road network that appear to have been abandoned and the harsh bumps shake me awake every morning. Time for some new gloves! Now I can barely sense the vibrations coming from the road surface and feel like I control the streets, not the other way around. The gloves are also lightweight and stylish to boot. The commute can't be long enough!

SHORT FINGER X NF

GLOVES NATURAL FIT

GLOVES

PERFORMANCE GLOVES

GLOVES OF GLORY.

+

My first enduro ride after a long break reminds me just how tough the business of uphill riding is. At least the glove's ultra lightweight fabrics with wicking properties keep my hands cool. The reward for my hard work is waiting at the top: The trail. I need to be careful not to lose my grip on the hairpin bend into the rock garden! One last pull on the brakes before the diagonal approach to the last drop off, getting it wrong here could end nastily. But my bike and I take it in our stride thanks to the glove's extremely non-slip fabric. We've got it under control!

BACKPACKS

YOUR (DAILY) COMPANION.

The great-looking CUBE models combine maximum functionality with clean lines. The asymmetrical design that features across the entire collection doesn't just look good, it's functional, too. Hidden under the front flap is a handy tool compartment to keep all your trail essentials close at hand and right where you need them, whilst the backpack's streamlined shape is hugely comfortable to wear and guarantees maximum freedom of movement. I barely notice I'm wearing it. Perfect for those gnarly trails! The modern, abrasion-resistant outer gives the backpack a timeless, technical look and feel.

- raincover for PURE TEN & EDGE TRAIL

MATERIAL: 100% nylon

WEIGHT: 80 g

12113 grey

RAINCOVER LARGE

- raincover for OX 25+, EDGE TWENTY & EDGE HYBRID

MATERIAL: 100% nylon

WEIGHT: 100 g

12106 black

PROTECTION PAD

- multi-impact resistant
- protecting level 1
- residual force following EN 1621-2 under 11 kN
- washable by handwash

SIZE: one size

MATERIAL: viscoelastic soft foam

WEIGHT: 280 g

PANNIERS

BEST PROTECTION IN A TWIN PACK.

+ Whether heading to work or going on a cycling adventure to far-off places, the CUBE Travel Series keeps my luggage perfectly organised and protected. Durable materials, strategically positioned pads and reinforced sections along with high-quality workmanship make these bags my first choice. The bags in the Travel Series are functional and reliable companions for every situation.

12037 anthrazit

TRAVEL

- one pair of bike pannier bags
- 40-litre volume/pair
- quick-release buckle for easy attachment to the rack
- roll closure
- inside pocket
- adjustable and detachable shoulder strap
- raincover
- mesh side pocket
- compression straps
- asymmetrical design

VOLUME: 25 litres

WEIGHT: 1450 g

SADDLE BAGS

PRACTICAL ADDITION..

- + My sporty CUBE saddle bag always has room for essential items like patches, inner tubes and tyre levers. Water-resistant zips keep the contents dry and the clever CUBE saddle adapter or simple touch fastening makes fitting the bags fool proof.

12016 black

CLICK XS

- attaches via CUBE saddle adapter
- slender form

YOUR TRAINING, YOUR SUCCESS, OUR TECHNOLOGY.

+

The company relay race is coming up soon and our team plan to set the pace again this year. The training has been tough. Will it have been enough? The race will decide. Lap one, our first rider stays with the leading group. Lap nine, HR in the red, just don't get dropped! Penultimate lap and still in the breakaway – it might be enough. One last look at the RACE TRAIN computer: the lap time is good. My thigh muscles are screaming and my heart rate is at the absolute limit. I look behind me but there's nobody to be seen. The finish line appears the win is ours! Meticulous preparation pays off!

COMPUTERS
+ PUMPS

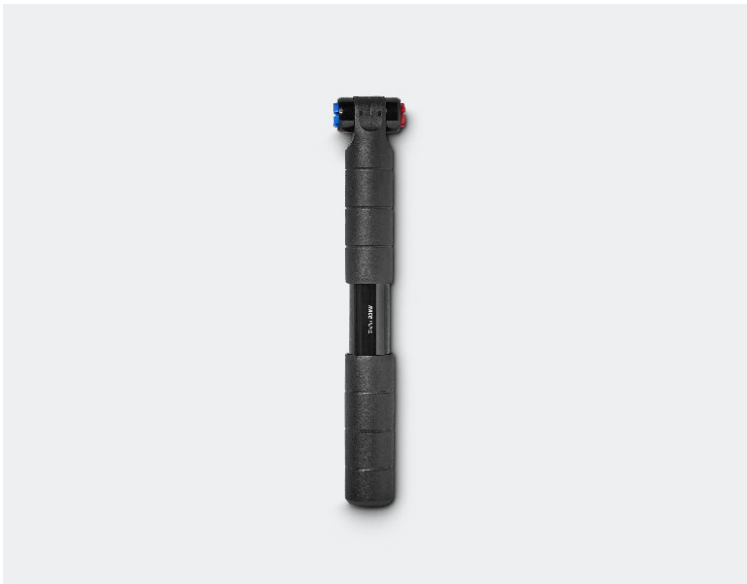

PUMPS

THE PERFECT COMPANION IN ANY SITUATION.

+ I'm running out of steam and so is my tyre, but I just have to ride that one last trail. With freezing fingers, there's no time to waste. 3-2-1: Go! Front wheel out, tyre lever in hand, tyre off, a quick couple of pumps of air in the inner tube to check where the puncture is, patch on, inner tube back in, tyre on and a couple of pumps to make sure it's sitting on the rim properly. Fortunately, I don't have to pump for long to fill the tyre. I simply unscrew the head of the RACE HYBRID pump, attach the CO2 cartridge and I'm ready to roll in no time.

SADDLES

YOUR GOAL - OUR KNOW-HOW.

+

I want the perfect saddle for my personal goals. My new C:68 made from high-end carbon meets my demands for top-quality material and lightweight construction. I can finally crack that magic kilogramme mark and close the gap to my closest rivals. Admittedly, I also think the saddle looks great when I park my bike outside the café. The CUBE Saddle Finder helps me to find the right saddle for my riding style and body measurements.

11535 black

RACE C:68 ZERO

- RACE C:68 ZERO saddle with ergonomic cutout
- C:68 technology
- carbon rail
- extra light

SIZE: M (145 mm)

RACE C:68

- RACE C:68 saddle with ergonomic cutout
- C:68 technology
- carbon rail
- extra light
- padding level 0.5
- microfibre upper

SIZE: M (145 mm)

MATERIAL: C:68 carbon, microfibre

WEIGHT: 120 g

GRIPS

STAY IN CONTROL.

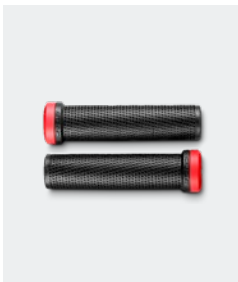

+

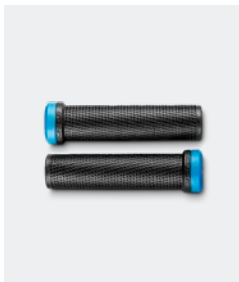

A direct feel plus great damping equals the perfect grip for my marathon bike! The Race SL has exactly the right combination. It's light and direct yet astonishingly comfortable despite the slimline design. And the coloured aluminium clamp not only looks great but also makes fixing and removal easy. Let's race!

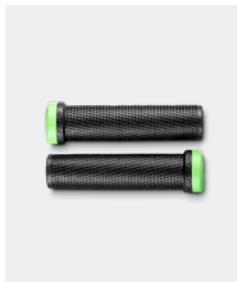

11270 black 'n' black

11271 black 'n' red

11272 black 'n' blue

11273 black 'n' green

RACE SL

- durable mountain bike grip suitable for cross country to trail/enduro
- dual-density material
- clamp at inner end
- proven Shock X technology absorbs vibrations

SECURITY HANDLEBAR END PLUGS

- adjustable security handlebar end plugs for thin-walled aluminium handlebars with an inner diameter of > 18 mm
- reusable due to rubber spread construction with socket screw
- almost flush with the bar end
- anodised end cap with laser print

SIZE: (DxL) 22 x 35 mm

MATERIAL: aluminium, rubber

WEIGHT: 36 g

13440 black

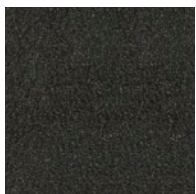

BAR TAPES

STEER IN STYLE AND COMFORT.

+ 50 mph! I feel every muscle fiber, my legs are strong and every little weight shift ends in a lane change. The handlebar tape smooths out every tiny street bump and gives me the feeling of precise control what a racing pilot needs. It doesn't matter if it is descending or ascending from the top of the track. Even if my beads of sweat comes down like raindrops, I have my handlebar under control. After my ride I still rise up mentally, so I am philosophizing with my bike fellows about the right hand wrapped techniques.

NATURAL FIT BAR TAPE COMFORT

- excellent vibration damping due to Natural Fit Gel coating
- sweat absorbent
- comfortable anti-slip surface
- reusable thanks to silicone backing
- good elasticity

33032 black

SIZE: (WxL) 30 x 2000 mm

CUBETOOLS

A MOBILE WORKSHOP AT YOUR FINGERTIPS.

+

The wind whistles in my ears, my heart is racing, adrenaline pumps through my entire body. I fly down the trail at full speed and push my bike to its limits. Even the most challenging tracks are no obstacle for me and my bike, because I know that I'm fully kitted out to deal with any situation and can restore my bike to its former glory whenever, wherever. I just grab my new CUBETOOL to change an inner tube, tighten a loose spoke and much more in no time.

MUDGUARDS

MAXIMUM PROTECTION, MAXIMUM STYLE.

- + Designed with attention to detail and mounted in seconds: CUBEGUARDS with their progressive design are compatible with 27.5" and 29" mountain bikes and can be fitted and removed in no time. Rubber mounting points offer effective protection against scratches to the frame and prevent the mudguard from twisting out of place. The matt and shiny finish and scratch-resistant stickers give the guards a high-quality look that will match any bike.

- matt-glossy finish
- optimised for 26" bikes, also suitable for various 28" bikes

13821 black

SIZE: (WxL) 80 x 500 mm

MATERIAL: polypropylene

WEIGHT: 178 g

272

CUBEGUARD TREKKING HPP 50 MM

- mudguard set for 28" bikes
- complex 2K plastic injection moulding
- high rigidity
- front and rear splash guard
- easy assembly
- internal cable routing
- integrated reflector
- fixings included
- rear attachment without stay possible

13890 black

MATERIAL: polypropylene

WEIGHT: 700 g

TREKKING SET HPA

- consists of article 13887 CUBE Rear Carrier TREKKING 28"-29" in black and article 13884 CUBE Cubeguard TREKKING PRO in black

MATERIAL: aluminium

WEIGHT: 1370 g

10393 black

CUBEGUARD TREKKING PRO

- protects against dirt spray
- CUBE design
- solid aluminium extrusion profile
- fixings included
- internal cable routing possible
- width 47 mm

13884 black

MATERIAL: aluminium

WEIGHT: 700 g

CUBEGUARD ATTAIN DISC

- road bike mudguard set
- fits all CUBE Attain Disc road bikes
- clean look
- fiberglass reinforced stays

MATERIAL: polypropylene/glasfibre

13777 black

CUBEGUARD DOWNTUBE

- tool-free assembly
- quick-release rubber mount for quick fitting and removal
- foam rubber prevents twisting and scratches
- compatible with most cable routing on the down tube

SIZE: (WxL) 120 x 350 mm

MATERIAL: polypropylene

WEIGHT: 95 g

13835 black

272

CUBEGUARD DOWNHILL

- protects the face from front wheel spray
- CUBE design
- quality plastic
- includes 4 reusable cable ties
- tool-free assembly
- optimised adjustment for maximum stability
- super light

SIZE: (WxL) 280 x 264 mm

MATERIAL: polypropylene

WEIGHT: 37.5 g

13868 black

CUBEGUARD SPLASH

- protects from front wheel spray
- CUBE design
- quality plastic
- tool-free assembly
- optimised adjustment for maximum stability
- super light

SIZE: (WxL) 107 x 420 mm

MATERIAL: polypropylene

WEIGHT: 21 g

13885 black

LATZZ

- protects the face from front wheel spray
- quick tool-free assembly
- very flexible due to elastic strap
- washable (without fabric softener)
- for suspension forks from 100-130 mm,

SIZE: (WxL) 90 x 230 mm

MATERIAL: elastane

WEIGHT: 17 g

13836 black

13836	Latzz XC	100-130 mm
13837	Latzz Enduro	140-170 mm
13838	Latzz Downhill	180-200 mm

13888 black

REAR CARRIER ADJUSTABLE 26"-29"

- compatible with CUBE Carrier Adapter
- suitable for 26" to 29" bikes
- stable aluminium construction
- rails for bags
- 25 kg maximum load
- rear light bracket
- reflector bracket

SIZE: (LxDxH) 370 x 190 x 415 mm

MATERIAL: aluminium

WEIGHT: 620 g

13887 black

REAR CARRIER TREKKING 28"-29"

- compatible with CUBE Carrier Adapter
- suitable for 28" to 29" bikes
- stable aluminium construction
- rails for bags
- 25 kg maximum load
- rear light bracket
- reflector bracket

SIZE: (LxDxH) 385 x 190 x 415 mm

MATERIAL: aluminium

WEIGHT: 670 g

13886 black

REAR CARRIER HEAVY DUTY 28"-29"

- compatible with CUBE Carrier Adapter
- suitable for 28" to 29" bikes
- stable aluminium construction
- rails for bags
- 25 kg maximum load
- rear light bracket
- reflector bracket

SIZE: (LxDxH) 410 x 190 x 415 mm

MATERIAL: aluminium

WEIGHT: 705 g

13889 black

CARRIER ADAPTER RILINK

- adapter system for all CUBE and ACID Carriers
- connects baskets and bags to rack
- hole spacing (LxW) 158 x 50 mm
- RILink compatible

SIZE: (WxL) 120 x 230 mm

MATERIAL: nylon, aluminium, plastic

IC CLAMP TREKKING

- retrofit spring clamp for the CUBE IC (integrated carrier) system
- long spring clamp for easy handling
- for use with all GTS models using IC technology

MATERIAL: aluminium, steel wire

13782 black

IC E-BIKE REAR CARRIER

- special designed E-Bike carrier with longer steel spring clip
- fits for CUBE Kathmandu Hybrid Pro 500 and Kathmandu EXC 500

MATERIAL: aluminium

13893	black
13894	grey

13893 black

HYBRID BAG RAIL

- retrofit pannier rail
- suitable for CUBE CITY and TOUR Hybrid bikes
- very light
- includes protection sticker to protect the frame from scratches

MATERIAL: aluminium

WEIGHT: 195 g

12027 black

TENSION BELT MOUNT

- upgrade for all CUBE trekking bikes and e-bikes with integrated cargo rack
- makes securing lashing straps easy

MATERIAL: aluminium

WEIGHT: 11 g

13783 black

KICKSTANDS

STAND STRONG.

It's happened to all of us at one time or another: We prop the bike up against the wall of a house or a tree and it falls over the second we turn our back. A big scratch on my new bike is not only annoying, it's completely avoidable. My CUBE kickstand, designed to fit everything from 15" junior bikes to 29" hardtails, makes scratches and dents a thing of the past. Finally my bike stays safe and stable, wherever I leave it. The range includes universal models for virtually all bikes in addition to the Easy Mount kickstands for CUBE frames to create a complete system solution.

13816 black

CUBESTAND PRO

- CUBE Easy Mount Kickstand integrated system
- suitable for Global Travel series, Cross Lite series, SL Road Pro/Race/SL series, MTB Comp series, LTD series, all e-bikes except full-suspension and carbon e-bikes and models with Split & Slide Dropout technology
- maximum 25 kg
- made in Germany

MATERIAL: aluminium

WEIGHT: 380 g

13817 black

CUBESTAND CMPT

- CUBE Easy Mount Kickstand integrated system
- suitable for Global Travel series, Cross Lite series, SL Road Pro/Race/SL series, MTB Comp series, LTD series, all e-bikes except full-suspension and carbon e-bikes and models with Split & Slide Dropout technology
- maximum 25 kg

MATERIAL: aluminium

WEIGHT: 338 g

13802 black

KICKSTAND UNIVERSAL

- suitable for 24" to 29" bikes
- easy assembly

MATERIAL: aluminium

WEIGHT: 376 g

13800 black

KICKSTAND KID BIKES

- suitable for CUBE kids bikes (CUBE Team Kid 200/240/260)
- adjustable length with inch markings
- CUBE design

MATERIAL: aluminium

WEIGHT: 302 g

13758 black

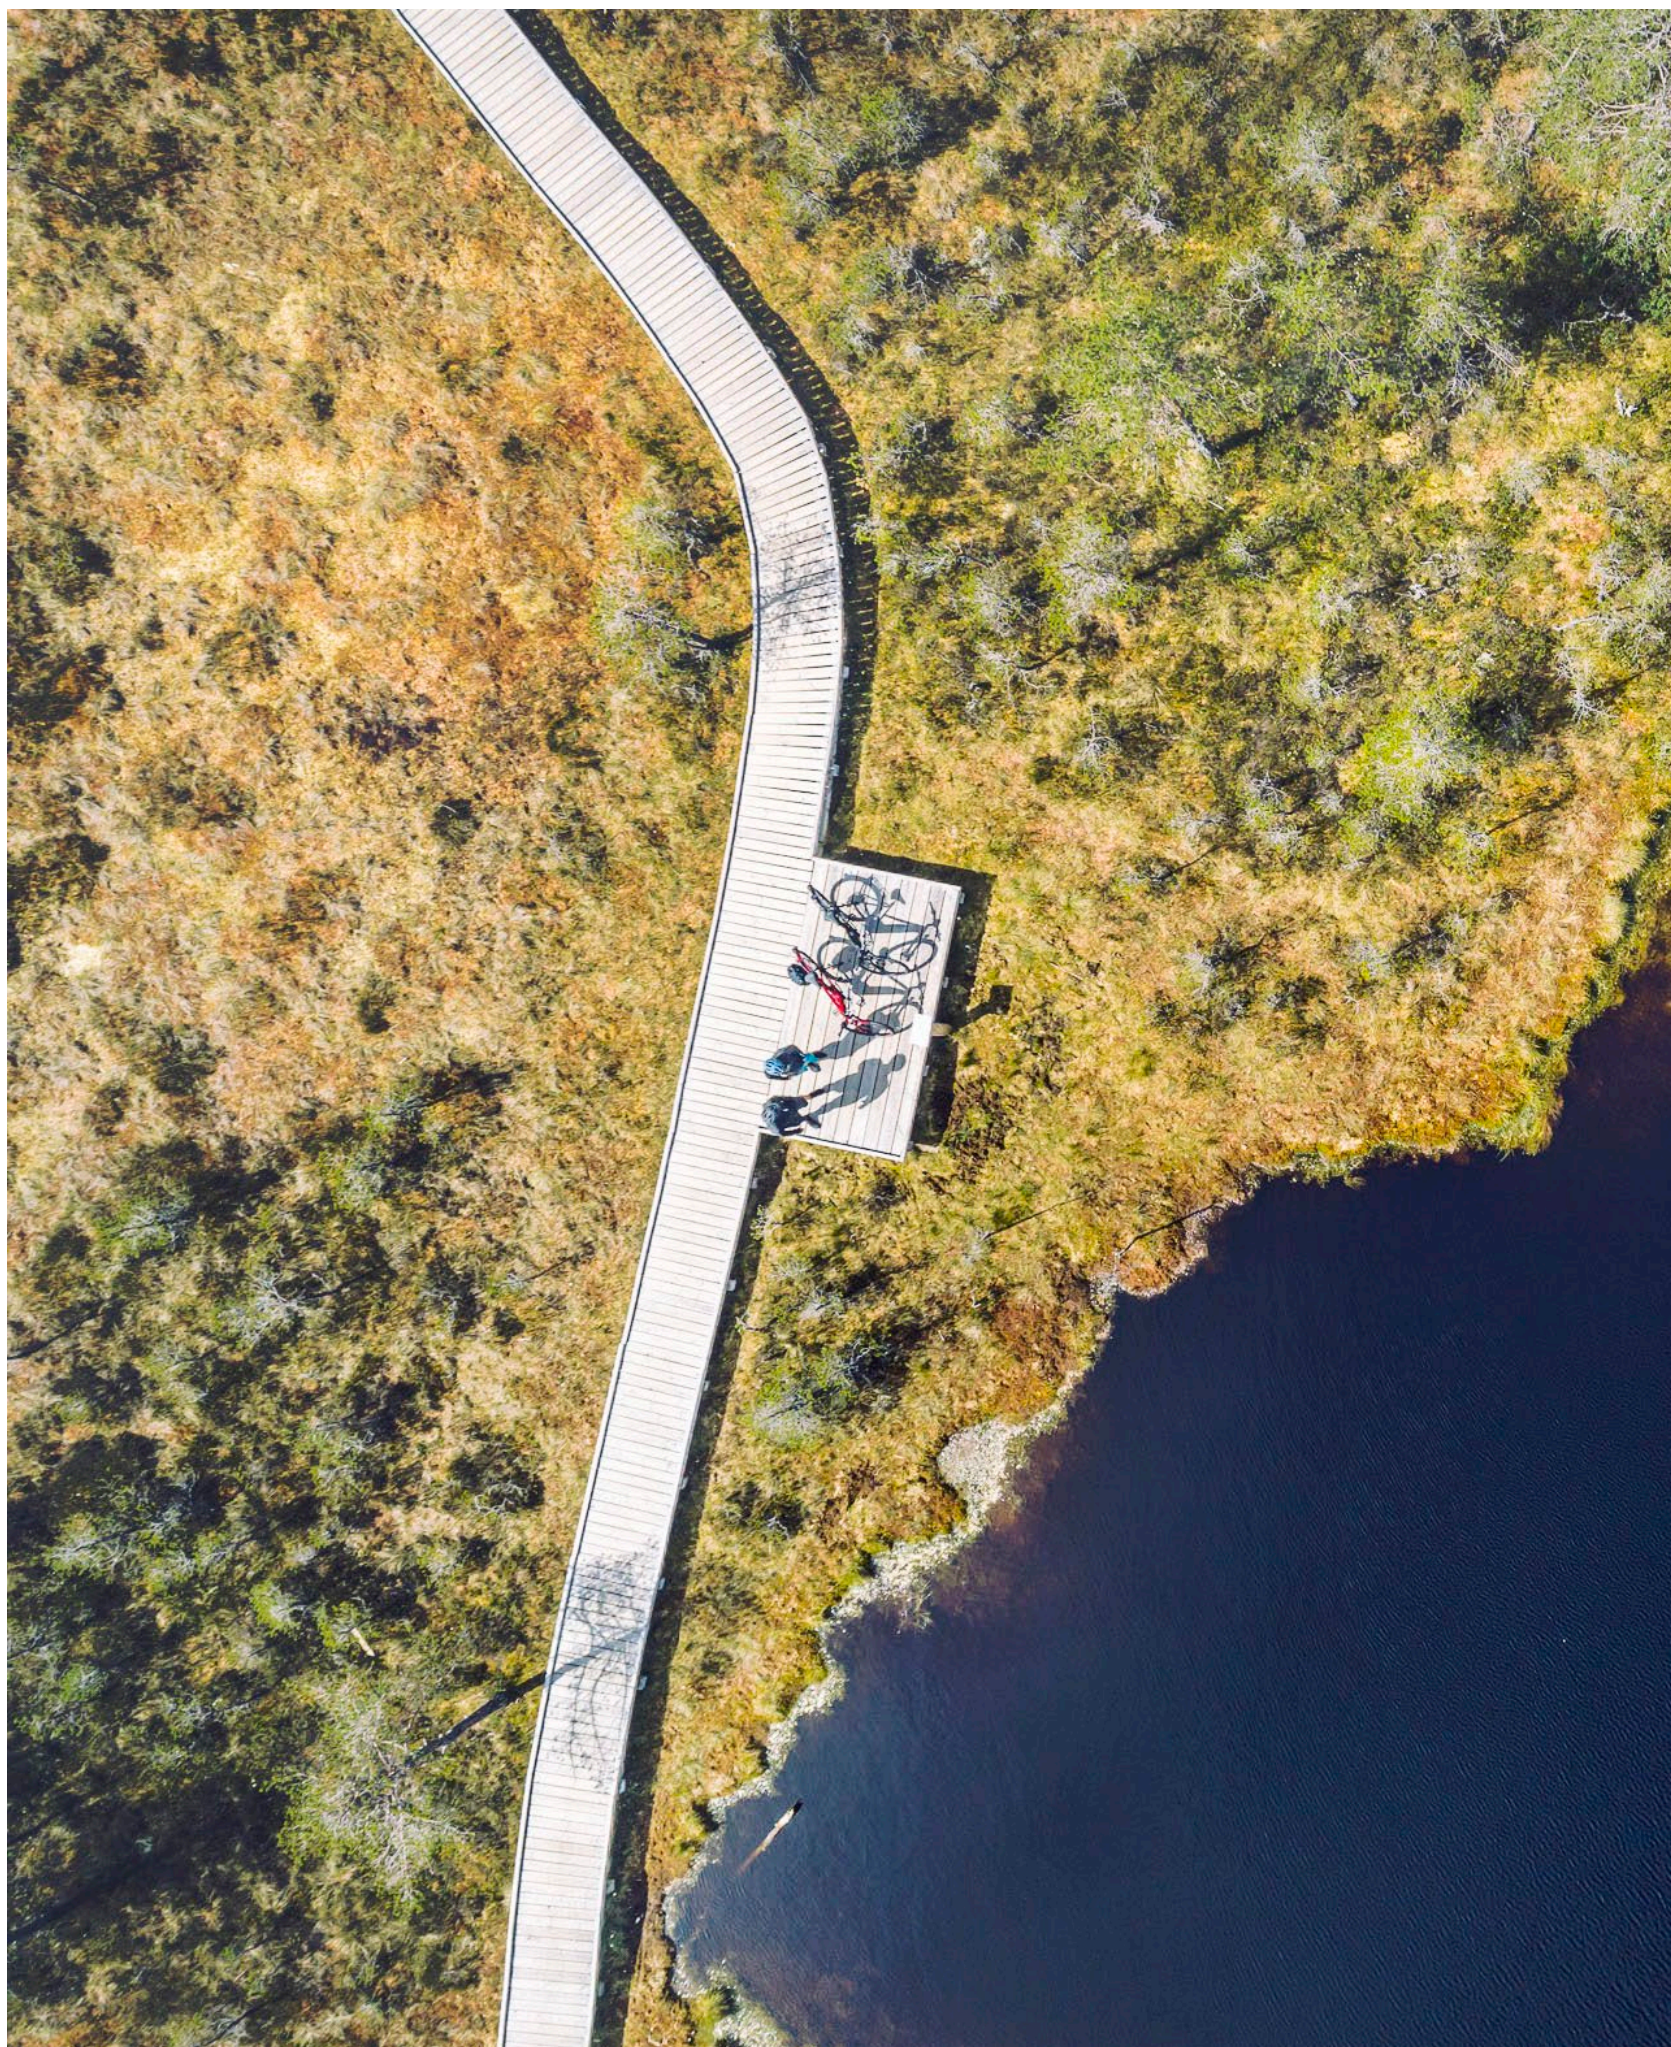

KICKSTAND KID BIKES 120

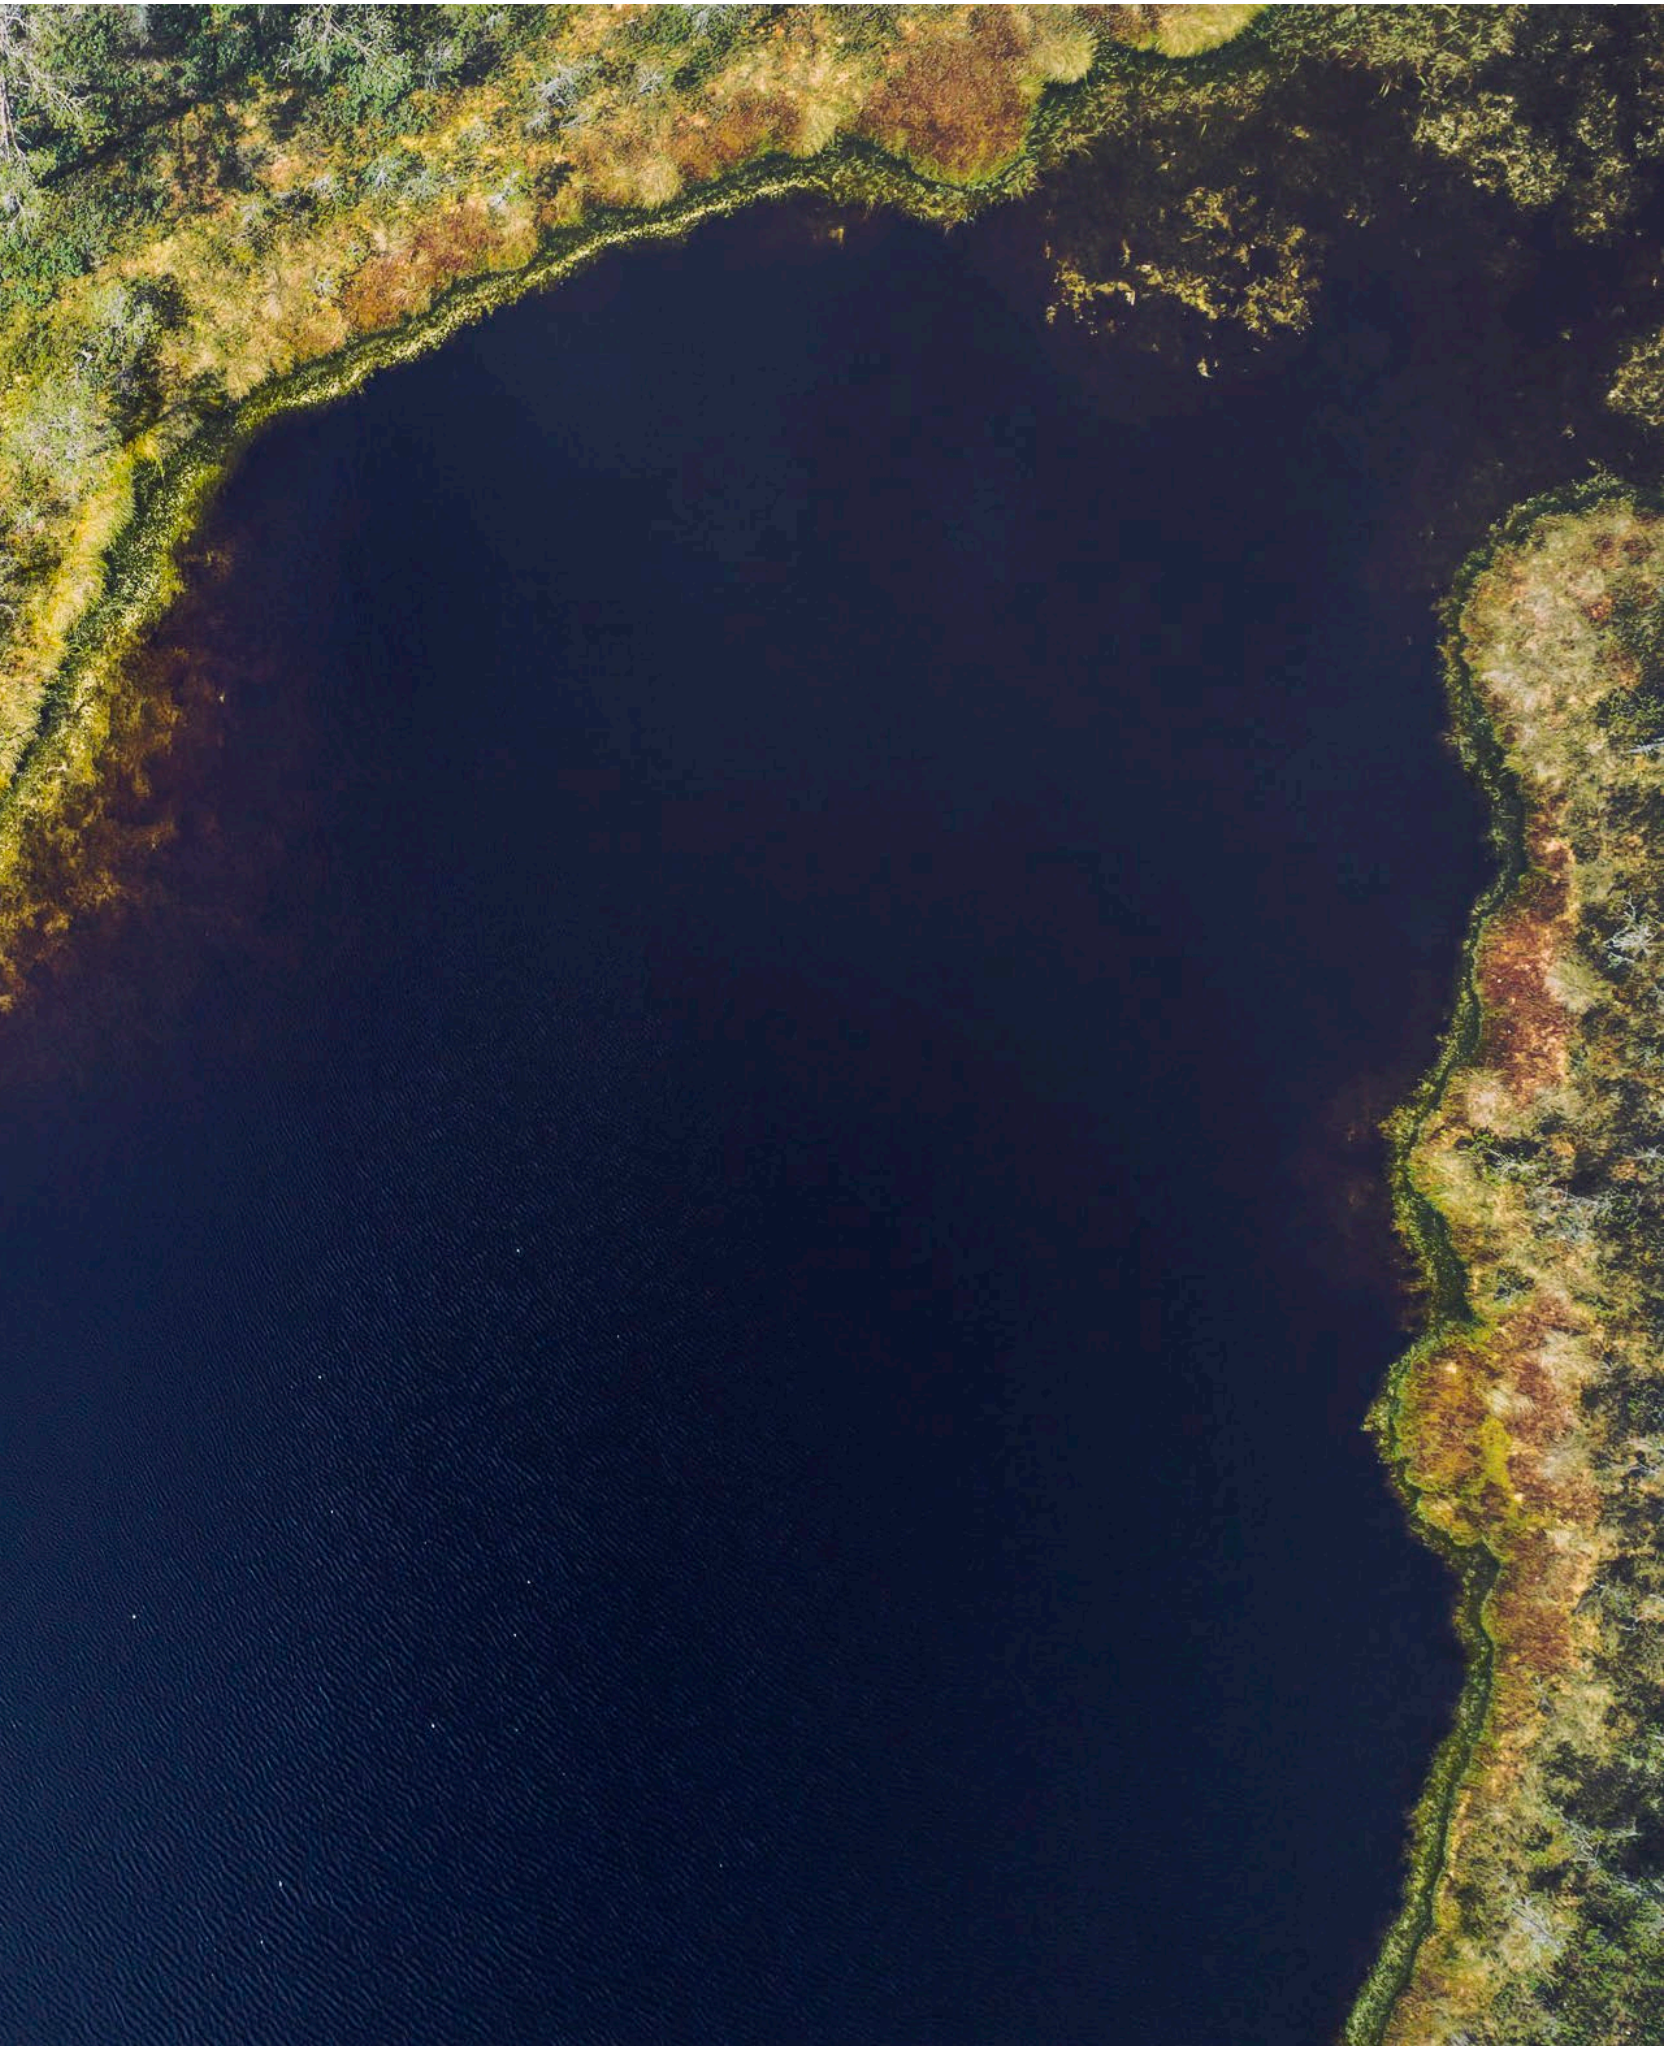

- suitable for CUBE kids bikes (CUBIE 120)
- adjustable length with inch markings
- CUBE design

MATERIAL: aluminium

WEIGHT: 240 g

DRINKING BOTTLES

ALWAYS **ONE SIP AHEAD.**

+

It's another one of those hot and dusty summer days made for lying in the hammock with a cold drink. My friends are sure to be at the local ice cream parlour. But I have other plans. Despite the sweltering heat, my mind is already on the next race – because I'm the proud owner of a tried-and-tested CUBE drinking bottle. I keep an eye on the level as always and know exactly how much I have left in the tank. Not a single drop of precious liquid goes to waste through the soft, ergonomic drinking cap, so there's even enough left for me to add on an extra loop at the end. I stay one sip ahead of the rest with the CUBE drinking bottles.

12950 black

GRIP 0.5L

BOTTLE CAGES

DON'T LOSE YOUR BOTTLE.

+

Designed for everything from mountain bike races to spring classics on the road bike or the first bike outing with the kids – the lightweight bottle cages not only keep a firm grip on my bottle, they are also quick to mount and easy to access. With a range of technologies and looks to choose from I find the perfect CUBE bottle cage to complement my bike. Just what I was looking for! And there are plastic, aluminium or carbon versions available.

BOTTLE CAGE HPC 2.0

- ultralight carbon bottle cage
- elegant CUBE design
- great value for money

MATERIAL: carbon
WEIGHT: 25g

13096 matt black 'n' glossy

BOTTLE CAGE HPP

- improved design for easy handling and a secure grip
- laterally accessible bottle cage, ideal for smaller frames
- soft plastic for a better bottle hold
- colourways to match the CUBE product range

BOTTLE CAGE HPA 1,5L

- aluminium bottle cage for transportation of 1.5l PET bottles
- elegant CUBE design

MATERIAL: aluminium

WEIGHT: 142 g

13057 black anodized

PROTECTIVE PARTS

BACK-UP FOR YOUR BIKE.

+ While some people buy outrageously expensive bikes and head off without a second thought, I am always thinking one step ahead. I want to enjoy my bike for a good few years yet so I keep the precious paint protected against aggressive grime and ugly scrapes with high-quality protective parts. They blend in to the overall look without compromising performance. My bike looks like new even after endless miles in the saddle.

BATTERY COVER

- brushed, insulating neoprene
- cutouts for on/off button and battery display
- reflective print
- small pouch for money, multitool etc.
- extra loop for fastening a minipump

12029 black 'n' grey

MATERIAL: 100% neoprene
WEIGHT: 60 g

CHAIN STAY PROTECTION NEOPRENE S/M

- optimised for most CUBE full-suspension mountain bikes
- special CUBE design

MATERIAL: neoprene
WEIGHT: 23 g

11722 black

CHAIN STAY PROTECTION NEOPRENE L

- optimised for most CUBE hardtail mountain bikes
- special CUBE design

MATERIAL: neoprene
WEIGHT: 28 g

11723 black

CHAIN STAY PROTECTION HPX

- universal chain stay protection
- low profile
- low weight
- vibration-damping Shock X material
- simple fitting via cable tie
- adapts to most CUBE frames

13302 black 'n' grey

MATERIAL: polypropylene, Shock X
WEIGHT: 28 g

	13302	black 'n' grey
	13303	black 'n' blue
	13304	black 'n' green

AERIUM C:68 / C:68 TT LITENING C:68 X

12815 black

HYDRATION SET AERIUM C:68 (2020)

- The Aerium Hydration-System is made from BPA-free and shatterproof material. It has a capacity of 750 ml, is easy to fill through a lockable opening, and is hard to miss when you're riding in aero position. Aerodynamically integrated accessory that can be attached and removed quickly and securely thanks to its redesigned magnetic click system.

MATERIAL: Tritan copolyester

VOLUME: 750 ml

12811 black

STORAGE BOX SET AERIUM C:68 (2018-2020)

- Need room for more energy bars, gels, an extra inner tube and CO2 cartridge? The top tube-mounted Storage Box with its internally padded base keeps the essentials within easy reach.

MATERIAL: polypropylene, TPR

12813 Basebar Aerium C:68 LOW

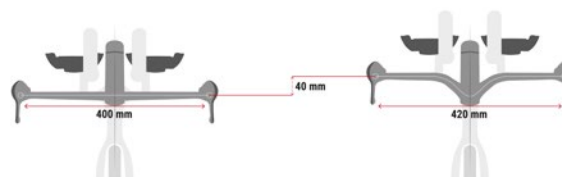

12812 Basebar Aerium C:68 HIGH

BASEBAR AERIUM C:68 HIGH (2018-2020)

- The sleek high option (riser bar) is 420 mm wide and 40 mm high, making reductions in aerodynamic drag possible that would otherwise require spacers.
- The low version (flat bar) is 400 mm wide and optimised for maximum aerodynamic efficiency.

SIZE: High: (W) 420 mm, Low: (W) 400 mm

MATERIAL: carbon

12818 Basebar Aerium C:68 TT LOW

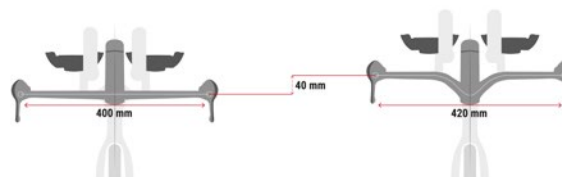

12817 Basebar Aerium C:68 TT HIGH

BASEBAR AERIUM C:68 TT (2020)

- The high version (riser bar) is 420 mm wide and 40 mm high for reduced aerodynamic drag and a super-clean look free of spacers.
- The low version (flat bar) is 400 mm wide and optimised for maximum aerodynamic efficiency.

SIZE: High: (W) 420 mm, Low: (W) 400 mm

MATERIAL: carbon

12814 carbon

SEATPOST AERIUM C:68 (2018-2020)

- There's a huge range of adjustability to put you in the perfect ride position. You have a large adjustment range for the desired seat position.

MATERIAL: C:68

12816 black

SEATPOST AERIUM C:68/C:68 TT (2020)

- The Setback Seatpost offers an extra layer of adjustability to find the perfect riding position. Its 3:1 profile is UCI compliant and suitable for use in official UCI time trials. All Setback Seatposts include a special seatpost clamp to adapt to the seat tube profile.

MATERIAL: C:68

12819 carbon

BASEBAR-STEM-COMBINATION LITENING C:68X (2020)

- The basebar-stem combination of the Litening C:68 is designed for maximum aerodynamic efficiency and is the perfect interface for most bike computers and GPS units.

MATERIAL: C:68

12819	400mm x 90mm
12819	400mm x 100mm
12819	400mm x 110mm

FLATPEDALS

WHAT WE **STAND FOR.**

+

I leave the stresses of the day behind, throw my bike into the back of the van and head for the nearest bike park. Endless trails await and I relish the challenge. I chase one line after another and work on a new personal record each time. I show the trail and my material no mercy. Why should I? After all, I'm riding CUBE pedals! Extremely resistant to mud and ground contact, these pedals deliver reliable grip and a long lifespan.

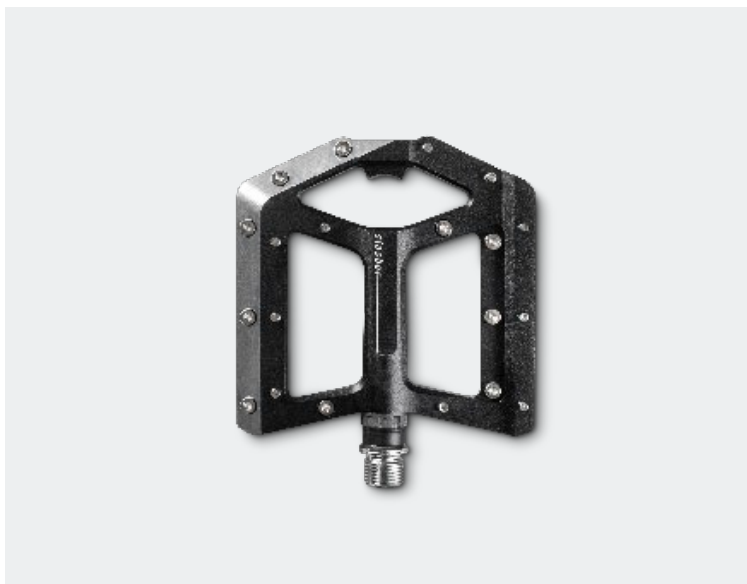

SLASHER

- light flat pedal
- CNC-machined aluminium body and CrMo axle
- chamfered edges for improved clearance in curves
- big platform
- extremely low profile
- ten replaceable pins per side
- includes washers to adjust pin length
- sealed bushing and two sealed cartridge bearings
- intricate two-tone CNC finish
- integrated bottle opener

SIZE: (LxWxH) 108 x 108 x 14 mm

MATERIAL: aluminium

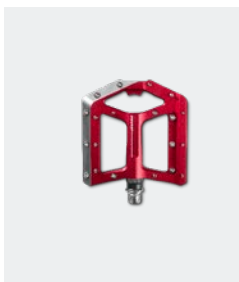

WEIGHT: 390 g

10013 blue

MAGURA CLARA 2001/LOUISE FR

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 36 g

10014 red

MAGURA CLARA 2001/LOUISE FR

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 32 g

10015 blue

MAGURA JULIE

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 42 g

10016 red

MAGURA JULIE

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 38 g

10017 blue

MAGURA LOUISE BAT/LOUISE CARBON

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10018 red

MAGURA LOUISE BAT/LOUISE CARBON

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 39 g

10019 blue

MAGURA MARTA

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10020 red

MAGURA MARTA

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10021 blue

SHIMANO

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10022 red

SHIMANO

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10023 blue

SHIMANO DEORE BR- M505/515/525/445/446

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10024 red

SHIMANO DEORE BR- M505/515/525/445/446

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10025 blue

SHIMANO DEORE XT/BR-M755

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10026 red

SHIMANO DEORE XT/BR-M755

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10027 blue

SHIMANO NEXAVE/BR-M555

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10028 red

SHIMANO NEXAVE/BR-M555

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10029 blue

SHIMANO NEW SAINT

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10030 red

SHIMANO NEW SAINT

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10031 blue

SHIMANO XT2000/XTR

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10032 red

SHIMANO XT2000/XTR

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10033 blue

MAGURA MT-2-4-6-8

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 34 g

10039 red

MAGURA MT-2-4-6-8

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 42 g

10040 blue

AVID CODE 2011

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 45 g

10041 red

AVID CODE 2011

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 38 g

10042 blue

AVID ELIXIR TRAIL X0/X9/X7 SRAM GUIDE R

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 27 g

10054 red

AVID ELIXIR TRAIL X0/X9/X7 SRAM GUIDE R

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 20 g

10053 blue

MAGURA MT5

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10055 red

MAGURA MT5

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10056 blue

MAGURA MT7

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 60 g

10057 red

MAGURA MT7

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 60 g

10058 blue

SRAM RED/FORCE/RIVAL22 S700/LEVEL

- good hot braking characteristics - braking force builds up quickly
- ideal for freeride/downhill use
- fast and strong
- powerful

MATERIAL: sintered
WEIGHT: 33 g

10059 red

SRAM RED/ FORCE/RIVAL22/S700/LEVEL

- soft mix
- minimises noise generation on vulnerable brake systems
- ideal for hobby and entry-level riders

MATERIAL: organic
WEIGHT: 33 g

10060 blue

1-PIECE BRAKE SHOES ROAD

- one-piece brake shoe
- length 50 mm

MATERIAL: aluminium, rubber
WEIGHT: 52 g

10034 silver'n'black

2-PIECE BRAKE SHOES ROAD

- two-piece brake shoe
- angle adjustable
- length 55 mm

MATERIAL: aluminium, rubber
WEIGHT: 47 g

10035 silver'n'black

PADS FOR 2-PIECE BRAKE SHOES ROAD

- spare pad for two-piece brake shoe ROAD
- length 55 mm

MATERIAL: rubber
WEIGHT: 21 g

10036 black

1-PIECE V-BRAKE SHOES

- brake shoe for V-brakes
- length 70 mm

MATERIAL: rubber
WEIGHT: 78 g

10037 black

PADS FOR 2-PIECE BRAKE SHOES ROAD

- spare pad
- compatible with all ROAD brakes
- extra light
- set

MATERIAL: rubber
WEIGHT: 14 g

10043 triple color

2-PIECE V-BRAKE SHOES

- two-piece brake shoe for V-brake
- Triple Contour design
- EN standard compound
- length 72 mm

MATERIAL: aluminium, rubber
WEIGHT: 56 g

10044 triple color

2-PIECE V-BRAKE SHOES

- two-piece brake shoe for V-brakes
- length 72 mm

MATERIAL: aluminium, rubber
WEIGHT: 56 g

10045 silver 'n' black

1-PIECE BRAKE SHOES STANDARD

- one-piece brake shoe for V-brakes
- Triple Contour design
- EN standard compound
- length 72 mm

MATERIAL: rubber
WEIGHT: 64 g

10046 triple color

PADS FOR 2-PIECE V-BRAKE

- spare pad for V-brakes
- Triple Contour design
- EN standard compound

MATERIAL: rubber
WEIGHT: 14 g

10047 triple color

PADS FOR 2-PIECE V-BRAKE

- spare pad for V-brakes
- simple rubber compound

MATERIAL: rubber
WEIGHT: 14 g

10048 black

1-PIECE BRAKE SHOES CANTILEVER

- one-piece brake shoe for Cantilever brakes
- length 72 mm

MATERIAL: rubber
WEIGHT: 63 g

10049 silver 'n' black

2-PIECE BRAKE SHOES CANTILEVER

- two-piece brake shoe for Cantilever brakes
- length 72 mm

MATERIAL: aluminium, rubber
WEIGHT: 37 g

10050 silver 'n' black

PADS FOR HYDRAULIC BRAKE

- spare pads for hydraulic brakes
- suitable for Magura
- length 55 mm

MATERIAL: rubber
WEIGHT: 19 g

10051 black

2-PIECE BRAKE SHOES ROAD

- two-piece brake shoe for ROAD
- Triple Contour ROAD brake pad
- extra light
- compatible with all current ROAD brakes
- length 55 mm

MATERIAL: aluminium, rubber
WEIGHT: 33 g

10052 triple color

CUBIE
